Both dietary protein and fat increase postprandial glucose excursions in children with type 1 diabetes, and the effect is additive.

Peripheral neuropathy in adolescents and young adults with type 1 and type 2 diabetes from the SEARCH for Diabetes in Youth follow-up cohort: a pilot study

M. Jaiswal, A. Lauer, C.L. Martin, R.A. Bell, J. Divers, D. Dabelea, D.J. Pettitt, S. Saydah, C. Pihoker, D.A. Standiford, B.L. Rodriguez, R. Pop-Busui, E.L. Feldman, for the SEARCH for Diabetes in Youth Study Group

Association of obstructive sleep apnea and glucose metabolism in subjects with or without obesity

Intakes of dietary fiber, vegetables, and fruits and incidence of cardiovascular disease in Japanese patients with type 2 diabetes

Elevated HbA1c and fasting plasma glucose in predicting diabetes incidence among older adults: are two better than one?

Low prepregnancy adiponectin concentrations are associated with a marked increase in risk for development of gestational diabetes mellitus

M.M. Hedдерson, J. Darbinian, P.J. Havel, C.P. Quesenberry, S. Sridhar, S. Ehrlich, A. Ferrara

Cardiovascular risk factors are associated with increased arterial stiffness in youth with type 1 diabetes: the SEARCH CVD study

Nonlaboratory-based risk assessment algorithm for undiagnosed type 2 diabetes developed on a nation-wide diabetes survey

Cohort study of insulin glargine and risk of breast, prostate, and colorectal cancer among patients with diabetes

The association between dietary flavonoid and lignan intakes and incident type 2 diabetes in European populations: the EPIC-InterAct study

All articles in Diabetes Care are available online at care.diabetesjournals.org. Cover articles (►) and ADA Statements are available free of charge. Each cover article is accompanied by a complementary slide set that includes a summary of the article’s key points and conclusions as well as associated tables and figures. Other articles are available free to print subscribers or can be purchased as e-prints or reprints.
Type 2 diabetes who do not have adequate glycemic control with metformin for diabetes prevention: an intent-to-treat analysis of the DPP/DPPOS. Diabetes Care 2012;35:723–730

Meta-analysis

Glycemic index, glycemic load, carbohydrates, and type 2 diabetes: systematic review and dose–response meta-analysis of prospective studies

Errata

The Shiga Microalbuminuria Reduction Trial (SMART) Group

4172 Canagliflozin compared with sitagliptin for patients with type 2 diabetes who do not have adequate glycemic control with metformin plus sulfonylurea: a 52-week randomized trial. Diabetes Care 2013;36:2508–2515

J. Vora

4172 The 10-year cost-effectiveness of lifestyle intervention or metformin for diabetes prevention: an intent-to-treat analysis of the DPP/DPPOS. Diabetes Care 2012;35:723–730

The Diabetes Prevention Program Research Group
