

Erratum

Erratum. Alogliptin, a Dipeptidyl Peptidase 4 Inhibitor, Prevents the Progression of Carotid Atherosclerosis in Patients With Type 2 Diabetes: The Study of Preventive Effects of Alogliptin on Diabetic Atherosclerosis (SPEAD-A). *Diabetes Care* 2016;39:139–148

<https://doi.org/10.2337/dc17-er06b>

In the Research Design and Methods section of the above-mentioned article, the measurement of carotid intima-media thickness (IMT) was described as follows: “The software system averaged 60 points of IMT values in the segment 2 cm proximal to the dilation of the carotid bulb (mean-IMT-CCA).” The sentence should read: “The software system averaged ~200 points of IMT values in the segment 2 cm proximal to the dilation of the carotid bulb (mean-IMT-CCA).”

The authors believe that this correction will not affect the results obtained in the study, and they regret the error.

The online version of the article has been corrected.
