An error occurred in the reporting of data in Table 2, “Health care use (yearly), incidence of diabetes-related complications from 2013 to 2016, and 4-year all-cause mortality among patients, segregated by latent classes.” The results in the rows under “Total no. of patients who developed diabetes-related complications from 2013 to 2016” should have been reported as number (percentage) instead of mean  $\pm$  SD. The authors apologize for the error.

The online version of the article (<https://doi.org/10.2337/dc19-2519>) has been corrected.
