Erratum

DOI: 10.2337/dc17-er05

In the article listed above, the second recommendation for anxiety disorders on page 2133 reads: “People with hypoglycemic unawareness, which can co-occur with fear of hypoglycemia, should be treated using Blood Glucose Awareness Training (or other evidence-based similar intervention) to help re-establish awareness of hypoglycemia and reduce fear of hyperglycemia.”

This recommendation should read: “People with hypoglycemia unawareness, which can co-occur with fear of hypoglycemia, should be treated using Blood Glucose Awareness Training (or other evidence-based similar intervention) to help re-establish awareness of hypoglycemia and reduce fear of hypoglycemia.”

The online version has been corrected to reflect this change.
