The formula for the calculation of the glucose management indicator (GMI) was incorrect as written in the above-referenced article. The sentence “GMI percentage was calculated as $(3.31 + 0.02392) \times \text{mean glucose in mg/dL}$ ” is changed to read as follows:

“GMI percentage was calculated as $3.31 + (0.02392 \times \text{mean glucose in mg/dL})$.”

The authors apologize for this error. The online version of the article (<https://doi.org/10.2337/dc20-0016>) has been corrected.
