Erratum

Erratum. Clinical Impact of Residual C-Peptide Secretion in Type 1 Diabetes on Glycemia and Microvascular Complications. Diabetes Care 2021;44: 390–398

https://doi.org/10.2337/dc21-er04b

The authors report that the following errors occurred in transcribing the results of the statistical computations into the abstract and text. In the Abstract, "insulin dose at baseline, 27% lower ($P = 2 \times 10^{-39}$)" should be "insulin dose at baseline, 9% lower ($P = 2 \times 10^{-17}$)." In the Results, under the section C-Peptide Association with Insulin Dose, "(ratio of geometric means 0.91, $P = 2 \times 10^{-39}$)" should be "(ratio of geometric means 0.91, $P = 2 \times 10^{-17}$)."

The authors apologize for the errors. The online version of the article (https://doi.org/10.2337/dc20-0567) has been corrected.
