

American Diabetes Association Journals Lead in Performance Rankings

[*Diabetes Care*](#)® and [*Diabetes*](#)®, the peer-reviewed research publications of the American Diabetes Association®, remain the most influential journals devoted exclusively to diabetes research and treatment.

Based on Clarivate Analytics' recently released 2019 Journal Citation Reports®, *Diabetes Care* and *Diabetes* lead the way among publications devoted to original diabetes research. According to Eigenfactor®, a measure of a journal's total importance to the scientific community, *Diabetes Care* and *Diabetes* are the top two journals devoted to diabetes research and rank 2nd and 3rd among the 143 journals indexed in the broader field of "endocrinology and metabolism."

Eigenfactor is calculated according to the number of papers a journal publishes and the number of citations it receives, with citations from high-impact journals weighted more heavily in the calculation.

Diabetes Care and *Diabetes* are also among the top "endocrinology and metabolism" publications according to Clarivate Analytics' Impact Factor. The Impact Factor for *Diabetes Care* increased from 15.270 in 2018 to **16.019** in 2019—the highest Impact Factor ever achieved by an American Diabetes Association journal. *Diabetes*, ADA's flagship research publication, achieved an impressive 2019 Impact Factor of **7.72**, up from 7.199 in 2018.

Impact Factor is a measure of how often work published in a peer-reviewed journal is cited in other publications in a given year. The statistic is considered to be a measure of a journal's prestige and influence.

Diabetes Care and *Diabetes* performed impressively also according to Article Influence Score®, a measure of a journal's prominence based on per-article citations; Immediacy Index®, a measure of how quickly articles are cited; and Cited Half-Life®, the average age of cited articles.

Diabetes Care and *Diabetes* are two of the most highly cited publications in the field of "endocrinology and metabolism." Combined, the journals were cited more than 120,000 times in 2019.
